

PREFACE

This *Existing Building Code of New York State* replaces Appendix K in the *Building Code of New York State* that went into effect on January 1, 2003. It combines language from the 2003 *International Existing Building Code* and the New York modifications developed by the State Fire Prevention and Building Code Council and its Existing Building Code Technical Subcommittee. In addition, administrative provisions were modified by the Department of State. The number of changes in text and organization would result in the use of margin bars adding confusion; thus, they are not used.
